APARNA MAURYA

Edinburgh, UK | | +44 7551671951

EDUCATION

University of Edinburgh — Edinburgh, UK
MSc [AI] — 2026 – 2027 (expected)

Indian Institute of Information Technology Guwahati — Guwahati, India
B.Tech in Computer Science & Engineering — 2015 – 2019

WORK EXPERIENCE

ServiceNow — Hyderabad, India
Senior Research Scientist — Jun 2024 – 2026

- Designed an enterprise-scale agentic AI evaluation framework, contributing 3 of 4 core metrics now deployed for customer-facing evaluation
- Developed LLM-as-a-Judge auto-evaluation to standardize performance tracking and speed up iteration from experiments to production
- Built end-to-end ML lifecycle components (data curation, fine-tuning, testing, deployment) meeting platform scalability requirements
- Partnered with Product, Architecture, QE and Customer Success to turn functional goals into maintainable technical designs

Nagarro — Gurugram, India
Senior Deep Learning Engineer — Oct 2023 – May 2024

- Developed a RAG e-commerce assistant with Elasticsearch, delivering 40% higher recommendation precision and a 25% retention uplift
- Implemented a multi-format knowledge platform (PDF, text, audio, video), cutting time-to-productivity by 50% via self-serve search
- Built a GCP NLP pipeline (NER, aspect-based sentiment) for long-form feedback, reducing analysis turnaround from weeks to 3 hours

Deep Learning Engineer — Oct 2019 – Sep 2023

- Engineered automated redaction of sensitive PowerPoint content (NER for text, object detection for images), deployed as serverless AWS inference
- Owned model training and delivery for client AI solutions: preprocessing, feature engineering, model selection, fine-tuning, evaluation

AI/ML R&D Trainee — Jul 2019 – Sep 2019

- Ran baseline training and evaluation experiments for NLP and deep learning projects, documenting findings for the team

L&T – Sargent & Lundy — Vadodara, India
Software Development Intern — May 2018 – Jun 2018

- Built a web-based stationery management system with Windows authentication, role-based access and inventory tracking

Indian Institute of Technology Ropar, Department of Mathematics — Ropar, India
Research Intern — Jun 2017 – Jul 2017

- Researched connected b-disjunctive domination in proper interval graphs, implementing algorithms to compute dominating sets

SELECTED PROJECTS

Deep Learning in Financial Market Prediction – *B.Tech project*

- Compared Random Forests, DNNs, LSTMs and Bi-LSTMs for stock prediction on large-scale price and news data, testing sentiment signals

Financial Market Analysis – *Additional project*

- Quantified how news affected company and competitor stock prices, combining NLP features with time-series analysis

RelEvent – *Mid-year project*

- Built a platform comparing event managers by ratings and pricing; led requirements, system design and backend implementation

TECHNICAL SKILLS

- **AI/ML:** Deep learning, NLP, computer vision, LLM systems, agent evaluation, RAG, fine-tuning, data structures and algorithms
- **Languages & libraries:** Python, SQL, C#; PyTorch, TensorFlow, scikit-learn, Pandas, Flask, OpenCV
- **MLOps & cloud:** Docker, Kubernetes, MLflow, DVC, PostgreSQL, Elasticsearch, Superset; AWS and GCP (serverless)
